No 2420706
HYGIENIC DESCRIPTION OF PRODUCTION

Substances, indicators (factors)

Effective specific activity of natural radionuclides (Aeff)
172 bk/kg

Hygienic standard
(СанПиН, МДУ,ПДК and others)

Effective specific activity of natural radionuclides (Aeff)
172 bk/kg
1 class - Aeff not more than 370 bk/kg

Smell
Ammonia (according to nitrogen)
Nitrites (according to NO2)
Nitrates (according to NO3)
Chromaticity
Turbidity
Quicksilver
Lead
Toxicity index
pH
Irritating impact on skin
Resorptive impact

Usage area:
As filtrating material in preparing the drinking water.

Necessary usage, depositing, transport and safety requirements:
without restrictions pursuant to radiation factor

Information entered to the etiquette:
/impression of the seal/

Conclusion valid up to 7 June 2015.

Chief health officer of the state:
G.E Bondarenko
